Facilities Operations & Maintenance Plan

2 | Page

preventative maintenance and upgrades to the physical resources and infrastructure. In the case of highly technical maintenance, repairs, replacement, or disposal, the work may be contracted with a qualified company.

In the case of specific program equipment, the program director or faculty are the experts. In some cases, maintenance or repairs can be performed internally, while other situations may require the outsourcing to technical experts. Each program has an equipment budget that is controlled by the program director. During the budgeting process, the program can make requests for the replacement, disposal, and/or upgrade of equipment.

Each department and program budgets for and purchases the supplies that are necessary for its operations.

Compliance with Relevant State Laws, Federal Codes and Procedures

Operation, development, and improvement of the College is undertaken in accordance with Utah State Code and the Utah Division of Facilities Construction and Management (DFCM), which defines a process for the request, approval, and limitations of capital development and capital improvement for state funded institutions.

Capital development and improvement project requests are reviewed by the College President and the Director of Facilities. The prioritized list is submitted annually to the Utah State Division of Facilities Construction and Management (DFCM). The State Building Board makes recommendations to the legislature for funding consideration.

Southwest Technical College complies with DFCM maintenance standards and is audited on an annual basis.

Compliance with applicable federal codes is overseen by the Director of Facilities to ensure each facility remains compliant. Fire alarm systems, sprinkler systems, fire extinguishers, eyewash stations, first aid kits, and AEDs are inspected and certified as appropriate. Documentation of inspections and communication is maintained on site.

Southwest Technical College conducts emergency drills on a quarterly basis. A log of these emergency drills will be maintained at the main campus.

Safety storage cabinets, physical SDS binders, and an online SDS database will be maintained for chemicals used in the facility. Disposal of material and products will follow applicable codes and procedures.

Exhibit 6.A.6.2 — Capital Development Requirements for the Division of Facilities and Construction Management in Utah Code

- (4) The division shall require that an institution of higher education that submits a request for a capital development project address whether and how, as a result of the project, the institution of higher education will:
- (a) offer courses or other resources that will help meet demand for jobs, training, and employment in the current market and the projected market for the next five years;
 - (b) respond to individual skilled and technical job demand over the next three, five, and 10 years;
 - (c) respond to industry demands for trained workers;
 - (d) help meet commitments made by the Governor's Office of Economic Opportunity, including relating to training and incentives;
 - (e) respond to changing needs in the economy; and
 - (f) respond to demands for online or in-class instruction, based on demographics.
- (5) The division shall:
- (a) (i) assist institutions of higher education in providing the information required by Subsection (4); and
 - (ii) verify the completion and accuracy of the information submitted by an institution of higher education under Subsection (4);
 - (b) assist the Utah Board of Higher Education to fulfill the requirements of Section 53B-2a-112 in connection with the finding that the division is required to make under Subsection 53B-2a-112(4)(b); and
 - (c) assist the Utah Board of Higher Education in submitting a list of dedicated projects to the division for approval and nondedicated projects to the division for recommendation and prioritization pursuant to Section 53B-22-204.

Exhibit 6.A.6.3 — Capital Improvement Requirements for the Division of Facilities and Construction Management in Utah Code

Effective 7/1/2024

63A-5b-405. Capital improvement projects.

- (1) (a) On or before January 15 of each year, the division shall, on behalf of all agencies, submit a list of anticipated capital improvement project requirements to the Legislature.
- (b) The division shall ensure that the capital improvements project list identifies:
- (i) each single capital improvement project that costs more than \$1,000,000;
 - (ii) each multiple capital improvement project within a single building or facility that collectively costs more than \$1,000,000;
 - (iii) each single capital improvement project that will be constructed over multiple years with a yearly cost of \$1,000,000 or more and an aggregate cost of more than \$3,500,000;
 - (iv) each multiple capital improvement project within a single building or facility with a yearly cost of \$1,000,000 or more and an aggregate cost of more than \$3,500,000;
 - (v) each single capital improvement project previously reported to the Legislature as a capital improvement project under \$1,000,000 that, because of an increase in costs or scope of work, will now cost more than \$1,000,000;

Exhibit 6.A.6.4 — Maintenance and Improvement Requirements for the Division of Facilities and Construction Management in Utah Administrative Rules

R23. Government Operations, Facilities Construction and Management.

R23-3. Planning, Programming, Request for Capital Development Projects and Operation and Maintenance Reporting for State Owned Facilities.

R23-3-1. Purpose and Authority.

- (1) This rule establishes policies and procedures for the authorization, funding, and development of programs for capital development and capital improvement projects and the use and administration of the planning fund.
- (2) The director's authority to administer the planning process for state facilities is contained in Section 63A-5b-501.
- (3) The statute governing the planning fund is contained in Section 63A-5b-503.
- (4) The director's authority to make rules for programming and program documents is set forth in Subsection 63A-5b-502(3).
- (5) The director's authority to make rules for the division or the director to perform the division or director's duties is set forth in Subsection 63A-5b-305(2)(c).
- (6) This rule provides the standards and requirements required by Subsection 63A-5b-402(3).
- (7) The director's authority to require agencies to report operation and maintenance expenditures is set forth in Subsection 63A-5b-702(2)(f).

Exhibit 6.A.6.5 — Utah Division of Facilities and Construction Management Preventive Maintenance Audit

STATE OF UTAH PREVENTIVE MAINTENANCE AUDIT

Facility Name:	Southwest Technical College
Address:	757 W 800 S
City, State Zip:	Cedar City, Utah 84720
Building Risk ID#:	05762, 10863, 14304
Agency Contact:	Ryan Fisher
Position & Phone:	Director of Facilities
Date of Audit:	04/08/2025
Conducted By:	George Sutherland

General

Overall, the facilities are in great condition. Numerous maintenance items are under contract and other maintenance items are performed by in-house staff. A CMMS program is used for corrective and preventative maintenance items and custodial services. A review of documentation and records was performed and produced excellent results. Emergency procedures, based on multiple scenarios, are in place and posted throughout the campus. Certain basic items such as asset information gathering, populating the CMMS, and tagging assets has been underway. Most equipment observed had the asset tags in place and inventoried in the CMMS program. A few items in Kanab are lacking asset tags and should be addressed. All of the spaces navigated were clean and orderly. The electronic documentation portion was presented great. Each numerical section of the standards were presented in folders numerically arranged. During the physical walk, it is clear the facility is well maintained.

Example of mechanical space, typical throughout site
