Facilities Operations & Maintenance Plan

Annual Evaluation of the Plan (and Revised as Necessary)

The Facilities Operations & Maintenance Plan is managed by the Director of Facilities and is evaluated on an annual basis by the Physical Resource Committee and revised as needed. Changes to the plan are approved by the President's Cabinet, which consists of administration, faculty, and staff.

Operation and Maintenance of Physical Facilities

Operations & Maintenance Plan

Plan Coverage

Adequacy of and Improvements to Physical Facilities

The day-to-day operation, maintenance, and needed upgrades of the physical resources occur in a timely and professional manner. Most of the routine operation, maintenance, and upgrades to college facilities and technical infrastructure are handled by this team. Significant systems maintenance or large project upgrades may be outsourced to local contractors.

Southwest Technical College maintains a computerized maintenance management system (CMMS) that allows all faculty and staff to submit work orders to the Facilities, Maintenance and Custodial. This electronic system allows for maintenance or repairs to be communicated to the appropriate personnel so the needed actions can be completed in a timely manner.

Budget available for Facility Maintenance and Improvement

The Director of Facilities develops an annual budget for facilities, fleet, maintenance, and custodial.

The Facilities Department has an annual budget maintained by the Finance Department and is readily available.
