Exhibit 6.B.1.2 — Procedures for Reporting and Investigating Health & Safety Incidents**6. Incident Reporting and Investigation**

All incidents resulting in personal injury or property damage should be reported and investigated promptly. This will help ensure that the injured person has been properly cared for and that, if possible, preventative action may be taken to prevent future accidents.

In addition, STECH strongly encourages *Near Miss* reporting. *Near Miss* reporting is a safe work practice that aims to eliminate potential incidents by ensuring that close calls or near accidents are proactively reported to facilitate corrective actions that prevent similar future incidents from occurring.

6.1 Reporting

- All incidents involving students, employees, or the general public must be reported to the Department Director where the incident occurred.
- Incidents involving criminal violations against the State (i.e., drug possession and weapons possession) must be reported to law enforcement. Incidents involving criminal violations against a victim must be reported to law enforcement if the victim so chooses.
- The Department Director is responsible for notifying the Vice President of Student Services when the incident involves a student, and the Director of Human Resources when the incident involves an employee or visitor.
- The Vice President of Student Services or an assigned designee will notify the respective high school administrator when the incident involves a secondary student.
- The faculty or staff member who dealt with the student incident is responsible for completing the incident report form.
- Injured employees should complete the incident report if able to do so. If the employee is unable, the report will be completed by the employee's supervisor or director.
- Witnesses should complete an Incident Witness Statement.
- The incident report must be completed as soon as possible, but no later than the end of the faculty or staff member's workday. This is necessary for accurate recollection and reporting of the incident.

6.2 Investigation

- The Incident Report Form requires that the cause of the accident and potential future preventative actions be identified.
- The Campus Safety Coordinator will conduct a follow-up investigation to determine whether safety protocols were followed and whether corrective action should be taken to prevent future incidents.
- The Campus Safety Coordinator will forward the findings to the Vice President of Student Services or the Director of Human Resources when the investigation is complete.
- The Vice President of Student Services or the Director of Human Resources will review the cause of the incident and take corrective or preventative actions when necessary.

6.3 Safety Committee Review

The STECH Safety Committee will conduct a quarterly review of all college-related incidents.

The committee may:

- Review responses to the incident.
- Recommend additional safety-related training.
- Recommend revisions to the Health and Safety Plan or any additional safety program.
- Recommend procedural changes to prevent future accidents.
- Recommend equipment or facility changes to prevent future accidents.
- Recommend disciplinary action in the case of negligence or criminal behavior.

3.6.2025

Safety Meeting Minutes

Attendance: Cory Estes Ryan Fisher Gail Goodman Wade Esplin Scott Leavitt Karyn Keanaaina
Cyndie Tracy Neal Mason Crystal Burger

(4:22) Review Minutes – December 12, 2024

(4:28) Safety Programs-In a COE year

- Health & Safety Plan - Annual review
 - o No Changes
- Hazard Communication Plan - Annual review
 - o Was reviewed but no Changes. Cory gets a monthly email from the SDS Vendor every month showing new changes.

Safety Concerns / Quarterly Incidents Under Review

- Student Illness – Kanab, 1/9/25
 - o Libby found a student laying on the ground in the bathroom stall. She was not able to answer but was coherent. Does not have a legal guardian. She is 19. The EMT and School officer did come and access her. She is back to class and has no other information.
 - Student Injury – Kanab Welding, 1/23/25
 - o Moving something heavy and smashed his finger. Did sustain a large cut on the finger. Back in class.
 - Student and parent didn't think it was a big deal but Carl felt it was the largest injury in welding that has ever been sustained. He did speak with the director and will be continually working on safety in welding.
 - Student Injury – PN, 2/4/25
 - o Happened off site at the Hospital.
 - o She fell down after fainting and hit her head. Patricia still did an incident report.
- Next meeting Cory will have the director over each department with the injury discuss the incident...

Exhibit 6.B.1.4 — Sample Incident Report Form

 Student Incident Report Thursday, July 6, 2023	
Southwest Technical Collage	
Involved person	Adult Student
Type of incident	INJURY
Date of incident	Thursday, July 6, 2023
Time of incident	12:55 PM
Date reported	Thursday, July 6, 2023
Time reported	12:55 PM
Location of incident	H&T Room 127
Name of student involved	[REDACTED]
Was personal protective equipment (PPE) in use?	Yes (if yes, describe below)
Describe PPE in use at the time of incident	eye pro
Did property damage occur?	No
Was law enforcement notified?	No
Narrative	Student failed to follow proper lock out and shut down procedures before taking the wiring apart on the trainer and shocked himself with 120ACV. Shock was sustained for approx 1 to 2 seconds. with 2nd deg. burns on hand. Student said he was in a rush to go to work/home and wasn't thinking properly.
What could have been done to prevent the incident?	Proper shutdown and lock out procedures.
Recommendations to prevent future incidents	student will go through safety instructions and procedures with student. to ensure he understands what is meant to happen and be preformed.
Date Incident report was completed	Thursday, July 6, 2023
Time Incident Report was completed	01:10 PM
Incident report completed by	[REDACTED]
Signature	[REDACTED]
