# Technical Infrastructure Plan

## Scope, evaluation, and stakeholders

The Director of Information Technology (IT) oversees safety and security, regulatory compliance, and general maintenance for all technical resources at the College. The Information Technology team provides support for all technical systems maintenance, repairs, and improvements.

The College IT Committee will annually evaluate the Technical Infrastructure Plan and revise as necessary. The annual evaluation is intended to ensure the plan's purpose is met and the associated resources and infrastructure are functioning as intended. This plan will be made available on Southwest Technical College's website.

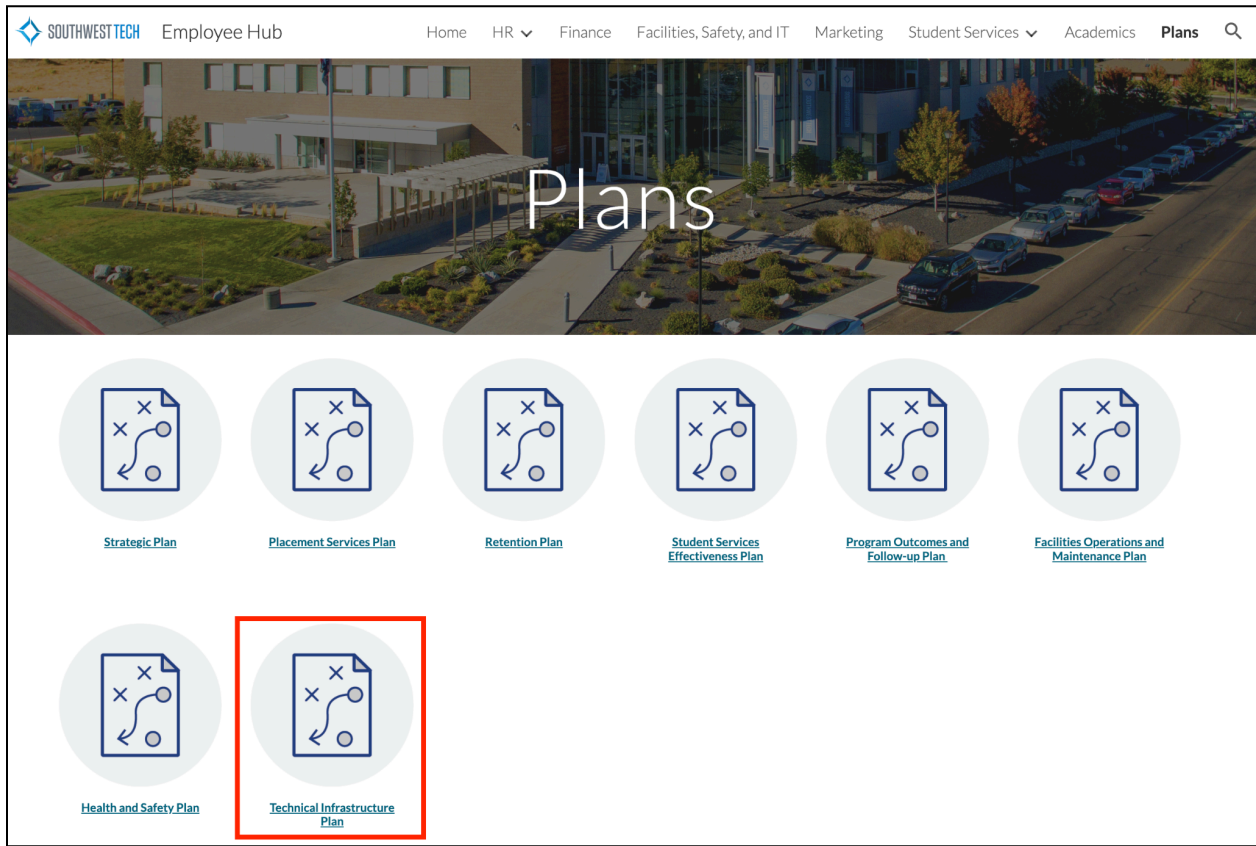

Changes to the plan are reviewed and approved by the President's Cabinet, which consists of administration, faculty, and staff.

## Adequacy, improvements, and protection of the technical infrastructure

The information technology personnel have the knowledge, expertise, and resources to ensure the day-to-day operation, maintenance, and needed upgrades of the technical infrastructure
