

6.C.2

A plan for the institution's technical infrastructure has been developed and is in use addresses adequacy, improvements and protection of the technical infrastructure, including distance education infrastructure if applicable.

Exhibit 6.C.2.1 — Technical Infrastructure Plan: Ongoing O&M Excerpt (pp. 1–2, 4)

1 | Page

Technical Infrastructure Plan

Adequacy, improvements, and protection of the technical infrastructure

The information technology personnel have the knowledge, expertise, and resources to ensure the day-to-day operation, maintenance, and needed upgrades of the technical infrastructure occur in a timely and professional manner. Most of the routine operation, maintenance, and upgrades to college technical infrastructure are handled by this team. Significant systems maintenance or large project upgrades may be outsourced to local contractors.

Southwest Technical College maintains a computerized maintenance management system (CMMS) that allows all faculty and staff to submit work orders to the Facilities, Maintenance, Custodial, and Information Technology Departments. This electronic system allows for maintenance or repairs to be communicated to the appropriate personnel so the needed actions can be completed in a timely manner.

Southwest Technical College partners with UETN to use Canvas LMS as a tool in delivering educational content. Using Canvas and LTI tools from third-party publishers, Southwest Technical College ensures hybrid students have access to an array of resources, including multimedia content, assignments, discussions, and other interactive elements. To further support student engagement and interaction, the college utilizes synchronous meetings via Zoom, enabling real-time communication between students and instructors. This comprehensive approach underscores Southwest Technical College's commitment to providing an accessible, flexible, and effective distance education infrastructure, tailored to the diverse needs of its student body.

During the annual budgeting process, instructional support staff in the Instructional Systems Design (ISD) department review, source, and implement distance education software and technology utilized for hybrid instruction. Collaborating with faculty members, ISD staff assess the adequacy of various tools and platforms by examining their compatibility with instructional objectives and their ability to facilitate engaging and interactive learning experiences. This assessment process involves coordination with the instructional design manager to address faculty's specific instructional needs, such as test proctoring, assessment creation, and LTI configurations within Canvas LMS. Leveraging resources like Cengage Unlimited, CidiLabs Design Plus Tools, Canvas Studio, Respondus Lockdown Browser and Respondus 4.0, Southwest Tech builds and administers hybrid content and assessment tools for hybrid instruction.

757 West 800 South	Zip	84720	Job # ST2580-1
	<Attn to>	Cory Estes	Location Campus Buildings

All work will be in done according to local codes and standards	
WE HEREBY SUBMIT SPECIFICATIONS AND ESTIMATES FOR:	Access Control Conversion

Provide and install the following: 1 – 4 Door Controller (Kanab) 5 – 4 Door Controllers (Cedar Old Building) 9 – 4 Door Controllers (Cedar New Building) - Connect up customers existing access control hardware (Readers, Locks, Exit Devices) to new PRIMA access control panels. - Customer to provide 1 external Static IP address at each location for networking of access control panels. - Set up schedules, users, access levels with customer, train customer designated personnel on operation and use. Information to be provided in advance so initial programming can be done prior to arrival on site to help minimize any down time and provide a smooth transition between systems.	* Prices do not include connecting to any other equipment other than equipment specified in the equipment description in this proposal. Any equipment not provided by Tytan Security will be subject to an hourly rate plus material costs for connections and hookup. * Tytan Security will not assume any liability or will not guarantee any systems that are connected to equipment not provided by us. * Any modifications to system components or any other system specifications will be subject to an hourly rate bill. Any modifications not specified during hookup and during termination of the system that require a second or more trips to modify the system will be subject to an additional hourly rate bill
--	--

WE PROPOSE HEREBY TO FURNISH MATERIAL AND LABOR IN ACCORDANCE WITH THE ABOVE SPECIFICATIONS FOR THE SUM OF:	
\$ 25,548.00 (Twenty Five Thousand Five Hundred Forty Eight Dollars)	
PAYABLE AS FOLLOWS:	50% on acceptance, balance on completion
AUTHORIZED SIGNATURE:	Michael Allen – Vice President of Commercial Operations
DATE:	16 February 2023

ACCEPTANCE OF PROPOSAL: The above prices and specifications and conditions are satisfactory and are hereby accepted. You are authorized to the work as specified. Payment will be made as outlined above. Credit and Collections: It is agreed that all material and material cost will be due 10 days from the date of invoice. A service charge of 2% per month shall be made on all sums due to the seller which have not been paid within 30 days from the date of invoice, and buyer agrees to promptly pay said service charges. It is further agreed that the acceptance of the goods and services constitutes an agreement to pay reasonable collection charges and/or attorney's fees and court cost that Tytan Security may incur on any sums due. Whereupon materials and services have not been paid and settled in a court of law it is the right of Tytan Security to remove any material that has not been paid for from the premises. Furthermore, Tytan Security is not responsible for any damages incurred while removing such material. Customer agrees to a standard Monitoring agreement of 60 Months for all new installations.

Exhibit 6.C.2.16 — USHE IT Shared Services

USHE IT Shared Services

For many years, the CIOs and IT Directors within the Utah System of Higher Education (USHE) have actively pursued collaboration on shared services and software contracts. This cooperative approach has significantly improved efficiency and reduced costs across the entire system. Committed to ongoing innovation and financial stewardship, our USHE CIOs and IT Directors continuously explore new opportunities for collaboration to further enhance efficiency and achieve cost savings. The following information outlines our current shared services and contracts, as well as opportunities for future cooperative efforts we are exploring.

The Utah Education & Telehealth Network (UETN)

UETN provides higher education institutions with a robust infrastructure of broadband and broadcast technologies, linking over 2,000 K-12 schools, higher education institutions, public libraries, and telehealth sites across Utah's urban, suburban, and rural areas. Through UETN's centralized services, including maintenance and technical support, institutions avoid the need to hire extensive IT staff, minimizing downtime and ensuring efficient operation. Additionally, UETN negotiates bulk purchasing agreements for internet bandwidth, technology services, and equipment, resulting in lower costs and significant savings for individual institutions. Remarkably, our Utah Higher Education Institutions do not have to pay for internet connectivity because of UETN's comprehensive coverage, eliminating the need for separate solutions. UETN is nationally known and highly regarded across the country for its implementation model.

See Attachment 1

USHE Shared Cybersecurity Audits and Pen-Tests

Each year, an audit team consisting of elite information security staff from our USHE institutions spends a week testing four selected degree-granting institutions and four technical colleges. The auditors, who are not given special access during the tests, use industry best practice frameworks to identify weaknesses through activities such as phishing campaigns, social engineering, penetration testing, white-hat hacking, and vulnerability exploits. This rigorous risk assessment, which includes a written report with recommendations and action items, transforms theoretical exercises into practical defenses against hackers. The final report details what worked and what didn't, and why, enabling teams to learn new defense strategies and share security standards and best practices among institutions. This collaborative approach not only potentially avoids breaches by addressing identified issues but also results in significant savings of tens of thousands of dollars compared to private penetration testing at each institution.

USHE Security Program Audits

Wayne Bushman, the USHE Audit Director, set up a shared contract with Tanner to perform comprehensive IT audits for the institutions that do not have their own internal audit departments.

Exhibit 6.C.2.19 — Northstar SIS MOU with University Information Technology

**University Information Technology (UIT) Northstar Support and Development
Memorandum of Understanding**

This Memorandum of Understanding (MOU) is by and between the University Information Technology (UIT) and Southwest Technical College (“Southwest Tech”).

Overview

Northstar is a Student Information System (SIS) that is developed and maintained by a dedicated product team within the University Information Technology (UIT) department at the University of Utah. USHE owns the intellectual property rights for the Northstar system. An existing Memorandum of Understanding between USHE and UIT (the “UIT/USHE MOU”) details the specific responsibilities pertaining to licensing, funding, support, and development of the Northstar product and its dedicated support and development team. This MOU defines the roles and responsibilities of USHE and Southwest Tech with respect to Southwest Tech’s use of Northstar as their SIS.

All support and development for the Northstar product will be performed and managed within UIT according to the terms of the UIT/USHE MOU. In general, such support and development tracks UIT departmental software development lifecycle (SDLC) processes. In an effort to provide a consistent data platform with agile reporting capabilities, UIT will focus on the following core components and functionality:

Institution	FY23 FTE	% of FY23 FTE	Share of Funding	Equal Split Operation Costs	Total Allocation
Southwest Tech	468	6.3%	\$5,893	\$17,875	\$23,768

Exhibit 6.C.2.26 — GLBA Internal Audit and Risk Assessment

Southwest Technical College FY24-25 Risk Assessment						
Purpose	The purpose of this assessment is to assess and address the risks to customer information in all areas of operation, including three areas that are particularly important to information security: Employee Management & Training; Information Systems; and Detecting and Managing System Failures.					
Review Date	8/23/2024					
Compliance	Gramm-Leach-Bliley Act Cybersecurity Requirements (link). Presented to the College Board of Directors at least yearly in compliance with 16 C.F.R. 314.4.i (link)					
Conclusion	Completion of this worksheet satisfies the STECH GLBA Compliance Requirement.					

	Assessment Description	Comment	Current process in place (Y/N)	Current process effective (Y/N)	Additional safeguard and/or policy to be implemented	Responsible Office/Position
Part I	Employee Management and Training (successful information security programs depend on the employees who implement it)					
I.a	Check references or do background checks before hiring employees who will have access to customer information		Y	Y		HR
I.b	Ask every new employee to sign an agreement to follow your company's confidentiality and security standards for handling customer information		Y	Y		HR
I.c	Limit access to customer information to employees who have a business reason to see it.		Y	Y		IT Director
I.d	Control access to sensitive information by requiring employees to use "strong" passwords that must be changed on a regular basis (strong passwords require the use of at least six characters, upper and lower case letters, and a combination of letters, numbers, and symbols)		Y	Y		IT Director
I.e	Use password activated screensaver to lock employee computers after a period of inactivity		Y	Y		IT Director
I.f	Develop policies for appropriate use and protection of laptops, PDAs, cell phones, or other mobile devices. For example, make sure employees store these devices in a secure place when not in use. Consider that customer information in encrypted files will be better protected in case of theft of such a device.	General policies in place that are meeting these criteria. More specific policies will be considered	Y	Y		IT Director

Exhibit 6.C.2.27 — IT Account and Access Controls Management Internal Audit**EXECUTIVE SUMMARY**

The Internal Audit Office (IA) conducted a general risk assessment to determine the areas of highest risk to Southwest Technical College ("Southwest Tech"). As part of that risk assessment process, we selected to audit the implementation and effectiveness of CIS Controls 5 and 6, Account Management and Access Controls Management, respectively. These controls provide a framework to manage risks associated with inappropriate access to enterprise assets at Southwest Technical College.

Exhibit 6.C.2.26 — Utah Office of the State Auditor IT Environment & General IT Controls Review FY25 (QuickBooks)

**Office of the State Auditor
IT Environment & General IT Controls Review FY2025**

Entity: Southwest Technical College

Application(s): Quickbooks

Completed by (name, title, email): Jeff Swift, Director of IT, jswift@stech.edu

Reminder: Refer to the instructions provided in order to minimize follow-up and streamline reviews. This questionnaire is meant to be a high-level overview of the design of IT controls within your entity and specified systems, and to see how those controls have been implemented for FY25. Even if control design has not changed, standards still require us to review whether implementation is still happening.

I. Entity-wide General IT Environment & Controls (Complete only once for entire entity)

1. Is there a management steering committee responsible for reviewing and approving IT plans and priorities?
☐ **Yes** ☐ No

- If yes, who sits on this committee? If no, please explain why:

IT Manager (Jeff Swift); James Mullenau, VP of Student Services; Neal Mason, Director of Programs & Instructional Systems Design; Scott Leavitt, VP of Academics; Clarissa Crosby, Director of Finance; VaLyn Sherratt, Data Reporting and Quality Assurance Specialist.

Auditor Comments

2. How do you identify IT risks to financial reporting? How are they addressed? (Steering committee, risk assessments, questionnaires, etc.)

Answer:	The network and servers are being operated using best practices as a baseline. Security patches for all software are applied the day of issuance. All network devices and servers are being monitored by having the system logs forwarded to a central logging server and scanned for irregularities. In the event any discrepancies are detected they are immediately investigated, reported, and corrected.
Provided File(s):	SIEM Dashboard
