

6.C.5

A plan for the institution's technical infrastructure has been developed and is in use ensures computer system and network reliability whether provided directly by the institution or through contractual arrangements.

Exhibit 6.C.5.1 — Technical Infrastructure Plan: Computer System & Network Reliability (p. 3)

Technical Infrastructure Plan

Computer system and network reliability

Gigabit connectivity is provided by the Utah Education & Telehealth Network (UETN). Southwest Technical College supports a robust Gig and ten Gig backbone, enabling network services to students and staff. The College supports a full spectrum of wired and wireless access at each site. By designing the network in this manner, this provides a more effective method of management and security.

An active failover device for crucial services such as firewalls, wireless controllers, and servers are used to ensure reliability and access for students and staff. A redundant power supply has also been installed in each device to eliminate a single point of failure. Devices which are less critical in the network and are covered by a limited lifetime warranty, are used and replaced on a six to ten-year upgrade plan depending on budgets and end user requirements.

Power to operate all devices are protected and conditioned by uninterruptible power supplies (UPS) at all college locations. Backup generators are in place at the Health Professions & Trades Building (Main Campus) and the Automotive & Technology Building to provide additional backup power to ensure services uptime and data integrity. The Information Technology (IT) Department provides monitoring for all servers and data infrastructure and is available to handle major emergencies.

Your new way to Wi-Fi

Have you ever wished that you could just walk into a building and have your Wi-Fi work? No sign-ins, no dead zones, no user agreements—just active Wi-Fi that you don't have to think about.

While it's not a reality everywhere, we're a lot closer than we used to be, thanks to eduroam. eduroam allows students, researchers, teachers and staff from Utah college and K-12 schools to securely connect to the internet across campuses, districts and schools by simply opening their computing device.

And it doesn't just work on your home campus! It works on any campus you visit, as well as many public libraries, some Utah Department of Transportation sites and other public locations around the world. You don't have to sign in when you visit any of them—once you've activated eduroam, it just works in all those locations.

 Utah Education and Telehealth Network	
<u>Memorandum of Understanding</u>	
UETN Data Backup and Archival Service	
This Memorandum of Understanding ("MOU") is between the Utah Education and Telehealth Network ("UETN") and <u>Southwest Technical College</u> ("Stakeholder"). UETN provides a free backup and archival data service, through which information is stored at the University of Utah Downtown Data Center ("DDC") and a backup service, through which the information at the DDC is backed up at the Department of Technology Services Richfield Data Center. Those archive and backup services, along with associated features and functionality, are referred to collectively herein as the "Services".

Exhibit 6.C.5.9 — Northstar SIS MOU with University Information Technology

**University Information Technology (UIT) Northstar Support and Development
Memorandum of Understanding**

This Memorandum of Understanding (MOU) is by and between the University Information Technology (UIT) and Southwest Technical College ("Southwest Tech").

Overview

Northstar is a Student Information System (SIS) that is developed and maintained by a dedicated product team within the University Information Technology (UIT) department at the University of Utah. USHE owns the intellectual property rights for the Northstar system. An existing Memorandum of Understanding between USHE and UIT (the "UIT/USHE MOU") details the specific responsibilities pertaining to licensing, funding, support, and development of the Northstar product and its dedicated support and development team. This MOU defines the roles and responsibilities of USHE and Southwest Tech with respect to Southwest Tech's use of Northstar as their SIS.

All support and development for the Northstar product will be performed and managed within UIT according to the terms of the UIT/USHE MOU. In general, such support and development tracks UIT departmental software development lifecycle (SDLC) processes. In an effort to provide a consistent data platform with agile reporting capabilities, UIT will focus on the following core components and functionality:

Preservation of Data. In the event that a system-wide decision is made to move away from Northstar as the SIS, Northstar will turn off the external connectors, support will no longer be provided, and the database will become read-only.

Institution	FY23 FTE	% of FY23 FTE	Share of Funding	Equal Split Operation Costs	Total Allocation
Southwest Tech	468	6.3%	\$5,893	\$17,875	\$23,768

Exhibit 6.C.5.10 — Canvas LMS Participation Agreement with UETN Consortium**Participation Agreement with UETN for Canvas LMS and Canvas Tier 1 Software 2020 to 2025**

Participating Institution: Southwest Technical College

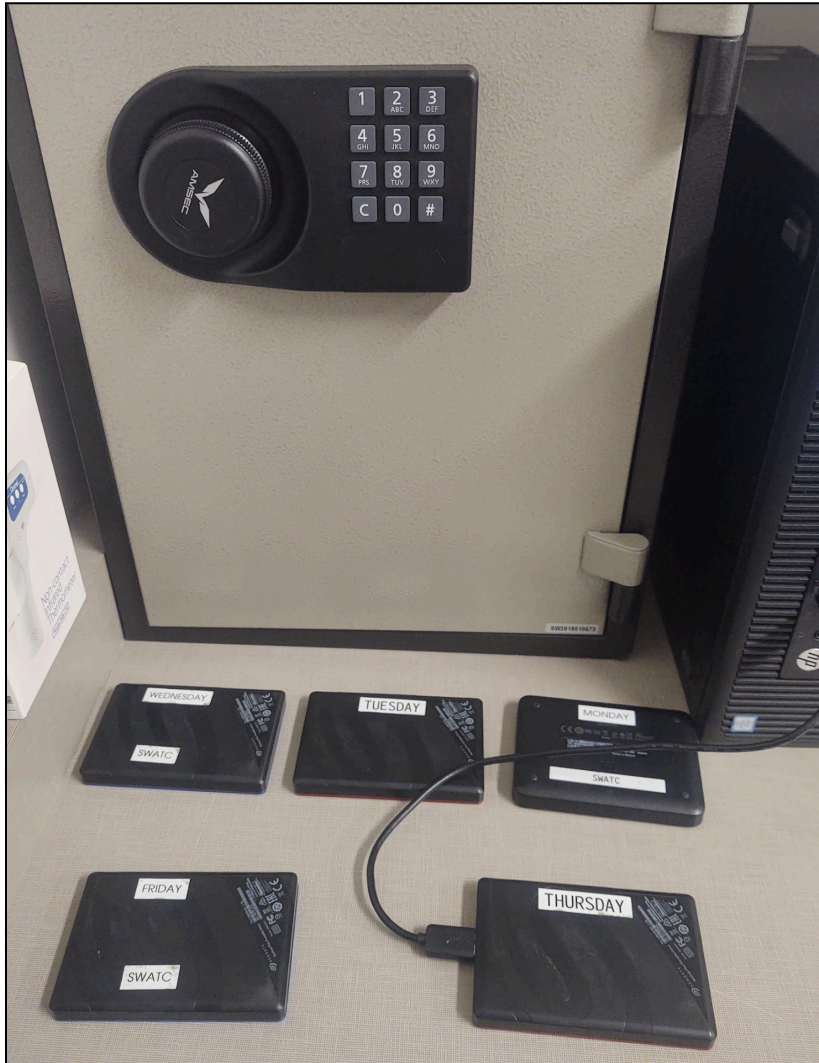

Agreement: Pursuant to Utah Code Section 53B-17-105, UETN is responsible to procure telecommunications services, software, and equipment on behalf of public and higher education entities in Utah. In carrying out this responsibility, and, at the request of the Participating Institution, and in accordance with applicable law (e.g., procurement law), UETN has entered into an agreement (the “Master Agreement”) with Internet 2 for their Instructure Canvas and Canvas Tier 1 Support products on behalf of Participating Institution. Participating Institution desires to deploy the Software licensed under that Master Agreement and otherwise participate thereunder. As such, the Participating Institution agrees to the following:
