

6.C.8

The technology used by the institution to deliver services and, if applicable, program content to students meets the needs of the students without creating barriers to student support or learning.

Exhibit 6.C.8.1 — Technical Infrastructure Plan: Student Technology Needs (p. 4)

Technical Infrastructure Plan

Student technology needs

Southwest Technical College partners with UETN to use Canvas LMS as a tool in delivering educational content. Using Canvas and LTI tools from third-party publishers, Southwest Technical College ensures hybrid students have access to an array of resources, including multimedia content, assignments, discussions, and other interactive elements. To further support student engagement and interaction, the college utilizes synchronous meetings via Zoom, enabling real-time communication between students and instructors. This comprehensive approach underscores Southwest Technical College's commitment to providing an accessible, flexible, and effective distance education infrastructure, tailored to the diverse needs of its student body.

During the annual budgeting process, instructional support staff in the Instructional Systems Design (ISD) department review, source, and implement distance education software and technology utilized for hybrid instruction. Collaborating with faculty members, ISD staff assess the adequacy of various tools and platforms by examining their compatibility with instructional objectives and their ability to facilitate engaging and interactive learning experiences. This assessment process involves coordination with the instructional design manager to address faculty's specific instructional needs, such as test proctoring, assessment creation, and LTI configurations within Canvas LMS. Leveraging resources like Cengage Unlimited, CidiLabs Design Plus Tools, Canvas Studio, Respondus Lockdown Browser and Respondus 4.0, Southwest Tech builds and administers hybrid content and assessment tools for hybrid instruction.

Exhibit 6.C.8.3— USHE IT Shared Services with Highlights of Software Used by Southwest Technical College

USHE IT Shared Services

For many years, the CIOs and IT Directors within the Utah System of Higher Education (USHE) have actively pursued collaboration on shared services and software contracts. This cooperative approach has significantly improved efficiency and reduced costs across the entire system. Committed to ongoing innovation and financial stewardship, our USHE CIOs and IT Directors continuously explore new opportunities for collaboration to further enhance efficiency and achieve cost savings. The following information outlines our current shared services and contracts, as well as opportunities for future cooperative efforts we are exploring.

The Utah Education & Telehealth Network (UETN)

UETN provides higher education institutions with a robust infrastructure of broadband and broadcast technologies, linking over 2,000 K-12 schools, higher education institutions, public libraries, and telehealth sites across Utah's urban, suburban, and rural areas. Through UETN's centralized services, including maintenance and technical support, institutions avoid the need to hire extensive IT staff, minimizing downtime and ensuring efficient operation. Additionally, UETN negotiates bulk purchasing agreements for internet bandwidth, technology services, and equipment, resulting in lower costs and significant savings for individual institutions. Remarkably, our Utah Higher Education Institutions do not have to pay for internet connectivity because of UETN's comprehensive coverage, eliminating the need for separate solutions. UETN is nationally known and highly regarded across the country for its implementation model.

Exhibit 6.C.8.8— Cengage Course, Sample Assignment, & Sample Simulation

The screenshot shows the Cengage MindTap course interface for "The Pharmacy Technician: Comp". The top navigation bar includes the Cengage logo, "MINDTAP", a search bar, and a user profile icon labeled "Neal". Below the navigation bar, the course title "The Pharmacy Technician: Comp" is displayed, along with "SHOW HIDDEN" and "EDIT" options. A "Collapse all" button and a green "Add / Create" button are visible. The main content area is divided into two sections. On the left, under "Getting Started", there is a video thumbnail and a description. Below this, "Section 1: Pharmacy Practice" is expanded, showing 25 activities. A table lists activities for "Chapter 1: History of Pharmacy", including "Chapter 1 Reality Check: Polling PRACTICE" with a 90% submitted status, 100% avg score, and 3 points. On the right, a "CLASS AVERAGE" box shows "82.22%". Below this, a "Recent Activity Scores" section contains a chart that is blank, with a message stating: "This chart is blank because no activities have reached their due date." An "Open Gradebook" button is at the bottom of the chart area.

The screenshot shows the Cengage MindTap Flashcards interface for "General Pharmacy Terminology". The top navigation bar is consistent with the previous screenshot. The main content area displays a flashcard with the text: "The action taken to remove a drug from the market is called a(n)". To the right of the card is a "Next Card" button. Below the card are buttons for "Previous Card", "Shuffle Deck", and "Create a Card". The interface also shows "1 of 30" and "Hide Card | Flip Card" options.

The screenshot shows the Cengage MindTap simulation interface for "Electricity & Electronics". The top navigation bar is consistent. The main content area features a 3D simulation of a car in a virtual shop. A "Skip Intro" button is overlaid on the car. To the right of the car is a car key. At the bottom, a text box reads: "Welcome to the virtual shop. In this simulation you will learn how to use a scan tool to diagnose a customer's concern." A "SCORE: 0" indicator is visible in the bottom right corner.

Exhibit 6.C.8.9 — CompTIA TestOut (Information Technology)

The screenshot shows the CompTIA TestOut Linux Pro course interface. The top navigation bar includes the CompTIA logo, the course title 'TestOut Linux Pro English 6.0', and icons for navigation, printing, and bookmarking. A dark sidebar on the left contains links for 'Home', 'Outline', and 'Search'. The main content area features a blue header with the text 'Section 0.1 Course Introduction'. Below this, a paragraph states: 'This course is designed to prepare you to pass the TestOut Linux Pro and CompTIA Linux+ Certifications. As you study this section, answer the following questions:'. This is followed by a bulleted list of three questions: 'What are the course prerequisites?', 'Which major topics are covered in the course?', and 'Which certifications does this course prepare you for?'. The section is titled 'Course Prerequisites' and includes a paragraph: 'Before you take this course, you should have a basic understanding of computers. You should have:'. This is followed by a bulleted list of two items: 'Computer systems and networking knowledge' and '9 to 12 months IT experience'. A paragraph then states: 'Although not a prerequisite, it's helpful if you've had some basic Linux exposure in both command line and GUI environments.' The final paragraph says: 'It's also helpful to have some additional certifications. Optional certifications could include the:'.

Section 0.1
Course Introduction

This course is designed to prepare you to pass the TestOut Linux Pro and CompTIA Linux+ Certifications. As you study this section, answer the following questions:

- What are the course prerequisites?
- Which major topics are covered in the course?
- Which certifications does this course prepare you for?

Course Prerequisites

Before you take this course, you should have a basic understanding of computers. You should have:

- Computer systems and networking knowledge
- 9 to 12 months IT experience

Although not a prerequisite, it's helpful if you've had some basic Linux exposure in both command line and GUI environments.

It's also helpful to have some additional certifications. Optional certifications could include the:

Hatfield: Introductory Maternity and Pediatric Nursing, Fifth Edition

About this Product

The same trusted solution, innovation and unmatched support that you have come to expect from CoursePoint is now enhanced with more engaging learning tools and deeper analytics to help prepare students for practice. This powerfully integrated, digital learning solution combines learning tools, case studies, real-time data and the most trusted nursing education content on the market to make curriculum-wide learning more efficient and to meet students where they are in their learning. And now, it's easier than ever for instructors and students to use, giving them everything they need for course and curriculum success!

Exhibit 6.C.8.12 — Canvas Resources

The image shows a Canvas course page for "TEPT 1010". The header says "Welcome to Introduction to Pharmacy". Below the header is a video thumbnail showing two pharmacy technicians in a lab setting. The video is titled "PHARMACY TECHNICIAN". At the bottom of the page are three navigation buttons: "Syllabus", "Modules", and "Gradebook".

The image shows two screenshots from a Canvas course. The left screenshot shows the "START HERE! INSTRUCTIONS" section, which includes a list of items to be completed: "Course Introduction and Standards", "Meet Your Instruction Team", "Rules of the Lab", "CS Code of Conduct Policy", and "Submitting Assignments in Canvas". Each item has a green checkmark indicating it is complete. The right screenshot shows the "Chapter 1 Practice Exam" section, which includes the title "The Pharmacy Technician - A Comprehensive Approach", the chapter "Chapter 1 - History of Pharmacy", and the pages "Pages 3 - 18". Below this are the "Learning Objectives" and a "Quiz Type" section.

Chapter 1 Practice Exam

The Pharmacy Technician - A Comprehensive Approach

Chapter 1 - History of Pharmacy

Pages 3 - 18

Learning Objectives:

- Describe the historical evolution of the profession of pharmacy.
- Discuss Hippocrates, the "father of medicine," and his role in the history of medicine.
- Name the "father of botany" and the "father of toxicology."
- Explain the establishment of the "pharmaceutical" created by a pharmacist.
