

6.C.9

Procedures for preserving and protecting student coursework, testing, and records are provided by measures that ensure their preservation and protection.

Note: Student coursework, testing, and records are stored digitally and backed up routinely. Service agreements are in place with SIS and LMS providers to ensure student data is backed up.

Exhibit 6.C.9.1 — Technical Infrastructure Plan: Student Coursework, Testing, and Records and Disaster Recovery Excerpt(p. 3–4)

Technical Infrastructure Plan

Student coursework, testing, and records

Utilizing the SCALE (H3C) virtual environment, all mission critical servers operate as a virtual environment. A secondary backup array is in one of the college's secondary campus locations, where a snapshot is taken and stored every 15 minutes. In the event of a server or array failure, critical servers can be brought online using either the primary array or directly on the secondary array. Having this capability reduces the amount of time critical services and data would be unavailable. As a further precaution, full backups are made on a removable drive each night (Monday through Friday). The removable drives can store 30 days of restorable copies. Backups are tested in a sandbox environment to ensure restorability.

Information Technology Disaster Recovery

In the event of a disaster, which would impact technical resources and operations, documentation and system backups are in place to reinstate all critical data. Use of a secondary virtual array allows the option to reinstate mission critical servers at a different location in the event of a disaster scenario.

Exhibit 6.C.9.2 — UETN Data Backup and Archival Services Agreement

 Utah Education and Telehealth Network	
<u>Memorandum of Understanding</u> UETN Data Backup and Archival Service	
This Memorandum of Understanding (“MOU”) is between the Utah Education and Telehealth Network (“UETN”) and <u>Southwest Technical College</u> (“Stakeholder”). UETN provides a free backup and archival data service, through which information is stored at the University of Utah Downtown Data Center (“DDC”) and a backup service, through which the information at the DDC is backed up at the Department of Technology Services Richfield Data Center. Those archive and backup services, along with associated features and functionality, are referred to collectively herein as the “Services”.

Exhibit 6.C.9.6 — Northstar SIS MOU with University Information Technology

**University Information Technology (UIT) Northstar Support and Development
Memorandum of Understanding**

This Memorandum of Understanding (MOU) is by and between the University Information Technology (UIT) and Southwest Technical College ("Southwest Tech").

Overview

Northstar is a Student Information System (SIS) that is developed and maintained by a dedicated product team within the University Information Technology (UIT) department at the University of Utah. USHE owns the intellectual property rights for the Northstar system. An existing Memorandum of Understanding between USHE and UIT (the "UIT/USHE MOU") details the specific responsibilities pertaining to licensing, funding, support, and development of the Northstar product and its dedicated support and development team. This MOU defines the roles and responsibilities of USHE and Southwest Tech with respect to Southwest Tech's use of Northstar as their SIS.

All support and development for the Northstar product will be performed and managed within UIT according to the terms of the UIT/USHE MOU. In general, such support and development tracks UIT departmental software development lifecycle (SDLC) processes. In an effort to provide a consistent data platform with agile reporting capabilities, UIT will focus on the following core components and functionality:

Preservation of Data. In the event that a system-wide decision is made to move away from Northstar as the SIS, Northstar will turn off the external connectors, support will no longer be provided, and the database will become read-only.

Institution	FY23 FTE	% of FY23 FTE	Share of Funding	Equal Split Operation Costs	Total Allocation
Southwest Tech	468	6.3%	\$5,893	\$17,875	\$23,768

Exhibit 6.C.9.7 — Canvas LMS Participation Agreement with UETN Consortium

Participation Agreement with UETN for Canvas LMS and Canvas Tier 1 Software 2020 to 2025

Participating Institution: Southwest Technical College

Agreement: Pursuant to Utah Code Section 53B-17-105, UETN is responsible to procure telecommunications services, software, and equipment on behalf of public and higher education entities in Utah. In carrying out this responsibility, and, at the request of the Participating Institution, and in accordance with applicable law (e.g., procurement law), UETN has entered into an agreement (the “Master Agreement”) with Internet 2 for their Instructure Canvas and Canvas Tier 1 Support products on behalf of Participating Institution. Participating Institution desires to deploy the Software licensed under that Master Agreement and otherwise participate thereunder. As such, the Participating Institution agrees to the following:

Exhibit 6.C.9.9 — GLBA Internal Audit and Risk Assessment

Southwest Technical College FY24-25 Risk Assessment						
Purpose	The purpose of this assessment is to assess and address the risks to customer information in all areas of operation, including three areas that are particularly important to information security: Employee Management & Training; Information Systems; and Detecting and Managing System Failures.					
Review Date	8/23/2024					
Compliance	Gramm-Leach-Bliley Act Cybersecurity Requirements (link). Presented to the College Board of Directors at least yearly in compliance with 16 C.F.R. 314.4.i (link)					
Conclusion	Completion of this worksheet satisfies the STECH GLBA Compliance Requirement.					

	Assessment Description	Comment	Current process in place (Y/N)	Current process effective (Y/N)	Additional safeguard and/or policy to be implemented	Responsible Office/Position
Part I	Employee Management and Training (successful information security programs depend on the employees who implement it)					
I.a	Check references or do background checks before hiring employees who will have access to customer information		Y	Y		HR
I.b	Ask every new employee to sign an agreement to follow your company's confidentiality and security standards for handling customer information		Y	Y		HR
I.c	Limit access to customer information to employees who have a business reason to see it.		Y	Y		IT Director
I.d	Control access to sensitive information by requiring employees to use "strong" passwords that must be changed on a regular basis (strong passwords require the use of at least six characters, upper and lower case letters, and a combination of letters, numbers, and symbols)		Y	Y		IT Director
I.e	Use password activated screensaver to lock employee computers after a period of inactivity		Y	Y		IT Director
I.f	Develop policies for appropriate use and protection of laptops, PDAs, cell phones, or other mobile devices. For example, make sure employees store these devices in a secure place when not in use. Consider that customer information in encrypted files will be better protected in case of theft of such a device.	General policies in place that are meeting these criteria. More specific policies will be considered	Y	Y		IT Director

Exhibit 6.C.9.10 — IT Account and Access Controls Management Internal Audit**EXECUTIVE SUMMARY**

The Internal Audit Office (IA) conducted a general risk assessment to determine the areas of highest risk to Southwest Technical College ("Southwest Tech"). As part of that risk assessment process, we selected to audit the implementation and effectiveness of CIS Controls 5 and 6, Account Management and Access Controls Management, respectively. These controls provide a framework to manage risks associated with inappropriate access to enterprise assets at Southwest Technical College.

Exhibit 6.C.9.11 — Utah Office of the State Auditor IT Environment & General IT Controls Review FY25 (QuickBooks)

**Office of the State Auditor
IT Environment & General IT Controls Review FY2025**

Entity: Southwest Technical College

Application(s): Quickbooks

Completed by (name, title, email): Jeff Swift, Director of IT, jswift@stech.edu

Reminder: Refer to the instructions provided in order to minimize follow-up and streamline reviews. This questionnaire is meant to be a high-level overview of the design of IT controls within your entity and specified systems, and to see how those controls have been implemented for FY25. Even if control design has not changed, standards still require us to review whether implementation is still happening.

I. Entity-wide General IT Environment & Controls (Complete only once for entire entity)

1. Is there a management steering committee responsible for reviewing and approving IT plans and priorities?
☒ **Yes** ☐ No

- If yes, who sits on this committee? If no, please explain why:

IT Manager (Jeff Swift); James Mullenau, VP of Student Services; Neal Mason, Director of Programs & Instructional Systems Design; Scott Leavitt, VP of Academics; Clarissa Crosby, Director of Finance; VaLyn Sherratt, Data Reporting and Quality Assurance Specialist.

Auditor Comments

2. How do you identify IT risks to financial reporting? How are they addressed? (Steering committee, risk assessments, questionnaires, etc.)

Answer:	The network and servers are being operated using best practices as a baseline. Security patches for all software are applied the day of issuance. All network devices and servers are being monitored by having the system logs forwarded to a central logging server and scanned for irregularities. In the event any discrepancies are detected they are immediately investigated, reported, and corrected.
