Hello,

Given the increase in FTE from Southwest Technical College's most recently submitted annual report, I've attached a required Heightened Monitoring form for Institutional Growth (FTE). Please let me know if you have any questions or need additional information or documentation before the November 1, 2024 deadline.

Kind regards,

Neal

Team Member

Introduction to the Team Report

Introduction to the Team Report		YES	NO	N/A	Value
The introduction of the team report, written by the team leader, is a narrative which describes the institution, its history, and its community. (Much of this information is found in the institution's self-study in the section called: Institutional Characteristics.) The introduction may also summarize information about team members and programs the institution offers.					
1	Introduction				Southwest Technical College was established as the Southwest Applied Technology Service Region Center, and began enrolling students in 1994 under the direction of a 15-member governing board comprised of public-school district superintendents, the presidents of the region's state higher education institutions, and several private sector employer representatives from the Southwest Region (Beaver, Garfield, Iron, Kane, and Washington Counties). Between 1994 and 2001, the Southwest Applied Technology Regional Service Center's governing board, under the direction of the local board, the Utah State Board of Education and the State Board of Regents was charged with providing competency-based vocational and technical training for both high school and adult students. The goal of the training was to prepare students with skills needed for entry-level employment. In 2001, the Utah Legislature created a non-degree and noncredit granting system of technical colleges, the Utah College of Applied Technology (UCAT), to meet the training needs of regions across the state. With the creation of this new system of technical colleges, Washington County was removed from the service region of Southwest Applied Technology College. Under this new configuration, the College held its first graduation in May of 2002. In the 2017 Legislative session, the Utah State Legislature changed UCAT to the Utah System of Technical Colleges (UTECH). This legislation also required Southwest Applied Technology College to change its name to Southwest Technical College. The College's Main Campus consists of two buildings, the Health Professions and Trades Building, which was approved in 2016, and the Automotive and Tech building. The college also operates three Instructional Services Centers at Beaver High School, in Kane County, and in Richfield in conjunction with Snow College. Southwest Tech continues to expand its offerings to meet service region employment needs. During the reaffirmation visit held from October 15th through 17th, the visiting team found the institution to be very well prepared for their visit. Their files were proficiently organized. The administration, faculty and staff masterfully provided documentation in their exhibits that show compliance with the ten Commission standards. The team found the hospitality shown to us to be superb. On October 16, 2019, when the team returned to their work room after lunch, an anonymous note was left on the keyboard of team member, Melissa Stephan. The note stated: "Look into possible misuse of state funds golfing, trips, meals, etc. Accounting asked to 'cover up' or be clever in how they word certain expenses." During the team review, the team did not find misuse of funds. We immediately called COE for direction in this situation. We were instructed to write this statement to make the Commission aware.
