Open the doors to your future with Southwest Technical College's **Information Technology (IT)** Program. Increase your knowledge of computer equipment as you learn how to store, retrieve, transmit, and manipulate data. This program explores hardware, networking, and computer programming through a flexible and self-directed schedule.

Summary Program Info **Outcomes & Job Outlook** Transfer Options

Program Outcome:

- Southwest Technical College Technical Certificate

Professional Certification Available:
Upon successful completion of the program, students may be eligible to obtain the following certifications:

- Comp TIA A+
- Comp TIA Linux+
- Comp TIA Network+
- Comp TIA Security+
- Microsoft Certified Solutions Associate (MCSA) include the following tests (3): 1) Installation, Storage, and Compute with WindowServer 2016; 2) Networking with Window Server 2016; 3) Identity with Window Server 2016.

"I just fell in love with programming. I wake up in the morning excited to program."

Exhibit 0.A.18 Worksheet B.6.B.4 — Sample Program Description and Objectives in Course Catalog

PROGRAM DESCRIPTION This program provides education and training in preparation for employment in Information Technology. Throughout the program, students apply classroom theory to computer hardware and software, mobile devices, operating systems, networking, security, cloud technology and other technologies relevant to the industry. Through a combination of simulations, hands-on and virtual labs, students will apply techniques for technology deployment, support, maintenance and troubleshooting. This training can be used as a step to gain valuable industry recognized certifications including CompTIA A+ and Network+. Additional certification opportunities may include CompTIA Security+, Microsoft, Amazon Web Services (AWS), Linux and more. Program Objectives • Develop and demonstrate skills required for entry level positions in Information Technology. • Demonstrate knowledge, skills and abilities aligning with standards for industry certifications. • Install, configure, maintain and troubleshoot common hardware and software. • Install, configure, maintain and troubleshoot operating systems. • Demonstrate effective verbal and written communication using industry specific terminology.

	Southwest Technical College Information Technology FY2026 / 20 Credit Hours
COURSE DESCRIPTIONS	
A+ Core I	3 Credits
A+ Core I prepares students to be successful computer technicians, capable of installing, maintaining, troubleshooting, optimizing, and securing desktop computers, laptops, mobile devices, and printers. This course aligns with the objectives of the CompTIA A+ Core 1 certification exam. Course Objectives: • Install and configure computer hardware components and peripheral devices. • Identify and configure basic networking components and protocols. • Install and configure laptops and other mobile devices. • Diagnose and troubleshoot device and network issues. • Compare and contrast cloud computing concepts. • Configure client-side virtualization.	
A+ Core II	3 Credits
A+ Core II is a follow up to A+ Core1 and provides further instruction on installation, configuration, maintenance, and security of various common operating systems and platforms. This course aligns with the objectives of the CompTIA A+ Core 2 certification exam. Course Objectives: • Install and Configure Windows, Mac, and Linux. • Identify best practices for safety, environmental impacts, communication, and professionalism. • Troubleshoot common operating system, malware, and security issues. • Identify basic vulnerabilities and protect against threats. • Install, configure, and maintain software in computers and mobile devices.
