As the world of technology is ever-changing, skilled maintenance technicians are in high demand. Get your hands-on experience in the **Automation Technology** Program at Southwest Technical College. With a strong foundation in industrial safety, this program will give the necessary skills in mechanical, electrical, and programming diagnostics and repairs. Coursework is both flexible and self-directed.

Summary	Program Info	Outcomes & Job Outlook	Transfer Options
Cost: \$3,625.00 Cost includes tuition, books, fees, and supplies. Click here for scholarship and financial aid resources. Next Start Date: July 1, 2025 This course is "open enrollment," and you can get started at any time. Call 435.586.2899 for more information. Want to enroll? Click here to get started. Program Length: 30 Credit Hours (This program can be completed in approximately 15 months, based on enrollment of 15 hours per week. If possible, students are encouraged to enroll in more hours per week to graduate faster.) Location: Main Campus – Health Professions and Trades Building Enrollment Requirement: CASAS Assessment or equivalent. Click here for more information. To schedule your CASAS Assessment, click here.			

"From the very beginning, my experience has not only met my expectations but exceeded them in almost every way. I have never felt so at home while in an academic environment. The instructors go above and beyond to make me feel welcomed and appreciated, and they actually care about my education as much as I do. Furthermore, the staff is extremely

	Southwest Technical College Automation Technology FY2026 / 30 Credit Hours
PROGRAM DESCRIPTION The Automation Technology program supports a wide variety of mechanical and automated systems. This program is designed to help prepare students with the necessary skills to become technicians in several critical industries. Students are introduced to a wide variety of tools, practices, and procedures. The program uses a competency based hands-on approach, with other teaching methods that are employed throughout. Program Objectives • Demonstrate a working knowledge of mechanical systems, maintenance, troubleshooting, repair techniques, and safety practices and procedures. • Apply system diagnostics and troubleshooting techniques. • Apply mathematical concepts to real world applications. • Read, utilize, and design blueprints and schematics. • Operate, install, maintain, modify, and troubleshoot electrical systems. • Operate, install, maintain, modify, and troubleshoot fluid power systems. • Operate, install, maintain, modify, and troubleshoot electrical motor control systems. • Operate, modify, maintain, program, and troubleshoot programmable logic controllers. • Implement and properly use a variety of precision measurement tools and procedures.
