PROGRAM DESCRIPTION The Pharmacy Technician program prepares students to support pharmacists by performing a wide range of practice-related duties for community, institutional, compounding, long-term care, mail-order, and other pharmaceutical settings. Students learn the most common medications, calculate dosages, process prescriptions, bill third-party insurance, learn aseptic techniques, and prepare sterile and non-sterile compounded medications. Students receive extensive hands-on training in the lab area using advanced pharmacy technology. Program Objectives • Practice personal and interpersonal skills needed in various pharmacy settings. • Demonstrate the pharmacy technician's role in the medication-use process and wellness promotion. • Recall the most utilized drugs by brand and generic name, indications, and interactions. • Solve pharmacy mathematical calculations. • Prepare sterile and non-sterile compounds.																																	
COURSE DESCRIPTIONS <table style="width: 100%; border-collapse: collapse;"> <tr> <td style="border-bottom: 1px solid black; padding-bottom: 5px;"> Introduction to Pharmacy </td> <td style="text-align: right; border-bottom: 1px solid black; padding-bottom: 5px;"> 3 Credits </td> </tr> <tr> <td colspan="2" style="padding: 5px;"> This course serves as an introduction to the pharmacy technician profession, pharmacy technician roles, and the different types of pharmacies within the healthcare delivery system. Students are introduced to state and federal pharmacy practice laws, and the pharmacists' patient care process. Students learn the concepts of pharmacology, medications, and calculations needed to ensure patient safety. </td> </tr> <tr> <td colspan="2" style="padding: 5px;"> Course Objectives: • Compare and contrast the pharmacy technician's role, pharmacist's role, and other occupations in the healthcare environment. • Describe and apply state and federal laws pertaining to pharmacy practice. • Recognize and apply the pharmacists' patient care process. • Relate the basic history of pharmacy to today's pharmacy practice. • Demonstrate the technicians' role in the medication use process. </td> </tr> </table>		Introduction to Pharmacy	3 Credits	This course serves as an introduction to the pharmacy technician profession, pharmacy technician roles, and the different types of pharmacies within the healthcare delivery system.
