Exhibit 2.D.2.3 — Job Knowledge - TEMA 1010 canvas module, assignment with description, and student example

The screenshot shows the Canvas LMS interface for the TEMA 1010 course. On the left is a navigation menu with options like Home, Modules, Grades, Cengage, LockDown Browser, New Analytics, People, Assignments, Quizzes, Syllabus, Collaborations, Rubrics, Files, Announcements, Discussions, Outcomes, BigBlueButton, Pages, and Settings. The main content area shows a list of modules. The 'Module 1: Medical Assistant and Health Care Team (10 hours)' is expanded, showing a list of assignments. The 'Medical Assistant Scope of Practice' assignment, worth 40 points, is highlighted with a red rectangular box. Other assignments in the list include 'Read: Chapter 1 The Medical Assistant, Health Care Team, and Medical Environment', 'PowerPoints: Chapter 1 The Medical Assistant, Health Care Team, and Medical Environment', 'The Medical Assistant, Health Care Team, and Medical Environment Concept Check', 'Why do you want to become a Medical Assistant?', 'Medical Assistant Certifications', and 'Role of a Medical Assistant'.

This screenshot displays the details of the 'Medical Assistant Scope of Practice' assignment. At the top right, there are buttons for 'Published', 'Assign To', 'Edit', and a menu icon. The main text area contains the following description: 'A medical assistant has a specific scope of practice that can vary from state to state. It is your role as a practicing medical assistant to know what your scope is and that you will be held liable if you don't follow it. Go to the AAMA website by clicking on the following link and look into your state's medical assistant scope of practice. Then write a two-paragraph essay explaining what you can and cannot do as a medical assistant.' Below the text is a link to 'American Association of Medical Assistants'. At the bottom, it shows 'Points 40' and 'Submitting a text entry box or a file upload'.

This screenshot shows a student's example response to the assignment prompt. The title is 'Medical Assistant Scope of Practice:'. The response is a two-paragraph essay. The first paragraph states: 'As a medical assistant, my scope of practice is clearly defined by state laws and regulations, which are established to ensure that I perform tasks within my training and abilities. In general, my responsibilities may include administrative tasks such as scheduling appointments, managing patient records, and billing, as well as clinical duties like taking vital signs, assisting with exams, administering injections, and performing basic laboratory tests. However, the extent to which I can carry out certain clinical tasks depends on the state in which I am practicing. For example, some states may allow medical assistants to perform more advanced duties like drawing blood or giving certain medications, while others may have stricter guidelines that limit these tasks to licensed healthcare professionals. Also as a medical assistant I am able to engage in tasks as long as it is supervised by a supervisor in accordance with the standards and ethics of practicing medicine.' The second paragraph states: 'There are also specific activities that are outside the scope of a medical assistant's responsibilities. For instance, I am not permitted to diagnose patients, prescribe medications, or perform any surgical procedures. Additionally, I must always work under the supervision of a licensed healthcare provider, such as a physician or nurse practitioner, and must not engage in activities that would be considered practicing medicine without a license. It is crucial for me as a medical assistant to understand the specific regulations and guidelines for my state to ensure I do not overstep my scope of practice, as doing so could result in legal and professional consequences.'

Your score 53

: 35-55

Your emotional intelligence level is... OK. You probably have good relationships with some of your colleagues, but others may be more difficult to work with. The good news is that you have a great opportunity to improve your working relationships significantly. Read more below to boost your EI still further.

I feel like I need to work more on my emotional intelligence to be a better person or when I do start working I can become a better co worker. I would like to work on my emotional intelligence to become a better person not just to my future co-workers but everyone. I feel like there are so many ways to improve my emotional intelligence that I have started to realize how bad it really is. My emotional intelligence level is ok but I want to get it to where it is excellent.
