

0.C.6 Worksheet Richfield.6

*Non-main campus sites comply with the criteria defined on the Worksheet for Non-Main Campus Sites. The following criteria apply to ALL non-main campus sites: **Preserving and protecting student coursework, testing, and records are provided by the use of storage devices, duplicate physical or digital records, security files, or other measures that ensure both the preservation and security of the records from fire, theft, vandalism, and other adverse actions.***

Note: All records on personnel, financial matters, student attendance, student progress, and outcomes data are stored in a cloud-based student information system (Northstar SIS).

Exhibit 0.C.6 Worksheet Richfield.6.9 — Northstar MOU

University Information Technology (UIT) Northstar Support and Development

Memorandum of Understanding

This Memorandum of Understanding (MOU) is by and between the University Information Technology (UIT) and Southwest Technical College ("Southwest Tech").

Overview

Northstar is a Student Information System (SIS) that is developed and maintained by a dedicated product team within the University Information Technology (UIT) department at the University of Utah. USHE owns the intellectual property rights for the Northstar system. An existing Memorandum of Understanding between USHE and UIT (the "UIT/USHE MOU") details the specific responsibilities pertaining to licensing, funding, support, and development of the Northstar product and its dedicated support and development team. This MOU defines the roles and responsibilities of USHE and Southwest Tech with respect to Southwest Tech's use of Northstar as their SIS.

Exhibit 0.C.6 Worksheet Richfield.6.10 — Technical Infrastructure Plan: Student Coursework, Testing, and Records and Disaster Recovery Excerpt(p. 3–4)

Technical Infrastructure Plan

Student coursework, testing, and records

Utilizing the SCALE (H3C) virtual environment, all mission critical servers operate as a virtual environment. A secondary backup array is in one of the college's secondary campus locations, where a snapshot is taken and stored every 15 minutes. In the event of a server or array failure, critical servers can be brought online using either the primary array or directly on the secondary array. Having this capability reduces the amount of time critical services and data would be unavailable. As a further precaution, full backups are made on a removable drive each night (Monday through Friday). The removable drives can store 30 days of restorable copies. Backups are tested in a sandbox environment to ensure restorability.

Information Technology Disaster Recovery

In the event of a disaster, which would impact technical resources and operations, documentation and system backups are in place to reinstate all critical data. Use of a secondary virtual array allows the option to reinstate mission critical servers at a different location in the event of a disaster scenario.

Exhibit O.C.6 Worksheet Richfield.6.11 — Incident Response Plan

Incident Response Plan

Updated February 2025

Purpose

This document outlines the plan for responding to information security incidents at the Southwest Technical College, including defining the roles and responsibilities of participants, the overall characterization of incident response, relationships to other policies and procedures and guidelines for reporting requirements.

Due to the wide variety of incidents that could face the college and the rapid advancement of threats against the college, its data and systems, this document is designed to provide guidance in reacting to data security incidents, determination of their scope and risk, and ensuring an appropriate response to information security incidents, including communication of incidents to the appropriate stakeholders and reducing the incident from reoccurring.

This protocol is not to be considered as policy due to the varied nature of incidents that can occur within a college environment. This variation in incidents may cause deviations from this protocol that are meant to provide the universities ability to respond to incidents in an optimal manner.

Anyone suspecting an exposure of college data or systems should immediately contact:

Stech IT: it@stech.edu and/or any member of the IT team: jswift@stech.edu, joey@stech.edu, aknafla@stech.edu.

 Utah Education and Telehealth Network	
<u>Memorandum of Understanding</u> UETN Data Backup and Archival Service	
This Memorandum of Understanding ("MOU") is between the Utah Education and Telehealth Network ("UETN") and <u>Southwest Technical College</u> ("Stakeholder"). UETN provides a free backup and archival data service, through which information is stored at the University of Utah Downtown Data Center ("DDC") and a backup service, through which the information at the DDC is backed up at the Department of Technology Services Richfield Data Center. Those archive and backup services, along with associated features and functionality, are referred to collectively herein as the "Services".
